

WILSON TELLS WOMEN HE'LL RENDER HELP

In a letter to the Jane Jefferson club of Colorado, the pioneer organization of Democratic women voters in the United States, President Wilson explains fully his interest in woman suffrage and pledges his support of the cause along the lines of state action.

This letter was delivered to the club at its banquet, recently held at Denver, Colo., by S. H. Thompson, assistant attorney general, who went to Colorado on this mission for the president. The letter follows:

THE WHITE HOUSE,

Washington, Aug. 7, 1916.

To the Officers and Members of the Jane Jefferson Club of Colorado:

My Dear Friend—I wish I could meet you face to face and tell you in person how deeply I appreciate the work your organization has done and purpose to do for the cause of Democracy and popular government.

I am told that you were the first woman's Democratic voters' organization in America, and I am sure that as such it must have been the instrument of impressing your convictions very deeply upon the politics of your state.

One of the strongest forces behind the equal suffrage sentiment of the country is the now demonstrated fact that in the suffrage states women interest themselves in public questions, study them thoroughly, form their opinions and divide as men do concerning them. It must, in frankness, be admitted that there are two sides to almost every important public question, and even the best informed persons are bound to differ in judgment concerning it. With such differences of judgment, it is not only natural, but right and patriotic, that the success of opposing convictions should be sought through political alignment and the measuring of their strength at the polls through political agencies. Men do this naturally, and so do women, though it has required your practical demonstration of it to convince those who doubted this. In proportion as the political development of women continues along this line, the cause of equal suffrage will be promoted.

Those who believe in equal suffrage are divided into those who believe that each state should determine for itself when and in what direction to extend the suffrage and those who believe that it should be immediately extended by action of the national government by means of an amendment to the federal constitution. Both the great political parties of the nation have in their recent platforms favored the extension of the suffrage to women through state action, and I do not see how their candidates can consistently disregard these official declarations. I shall endeavor to make the declaration of my own party in this matter effectual by every in-

fluence that I can properly and legitimately exercise.

Woman's part in the progress of the race, it goes without saying, is quite as important as man's. The old notion, too that suffrage and service go hand in hand is a sound one, and women may well appeal to it, though it has long been invoked against them. The war in Europe has forever set at rest the notion that nations depend in times of stress wholly upon their men. The women in Europe are bearing their full share of war's awful burden in the daily activities of the struggle, and more than their share as sufferers. Their fathers and husbands and sons are fighting and dying in the trenches, but they have taken up the work on the farms, at the mill and in the workshop and counting house. They bury the dead, care for the sick and wounded, console the fatherless, and sustain the constant shock of war's appalling sacrifices. From these hideous calamities we in this favored and beloved land of ours have thus far been shielded. I shall be profoundly thankful if, consistently with the honor and integrity of the nation, we may maintain to the end our peaceful relations with the world.

Cordially and sincerely yours,

WOODROW WILSON.

"MOVIE" STAR PICKS FAIRFIELD ROADSTER

Arthur H. Ashley, who is causing as many heart flutters among the feminine movie fans as there are flickers in the latest World film, "The Summer Girl," in which he is starring, has added a Paige roadster to his fleet of motor cars.

While the recent ascent of Mount Hood, Ore., by a Paige Fairfield "6-46" convinced him of the stamina and staunchness of the Paige, Mr. Ashley has no intention of using his new purchase for plunging over the Palisades, rolling off a jack-knife bridge or for any other movie stunt. The new Paige is just for his personal enjoyment.

Mr. Ashley, besides being an experienced Broadway actor, a movie star and a scenario writer of note, is also a motor car enthusiast. He now has three cars and two mechanics to keep them turned up, and all his spare time from the studio is spent in hitting the road. A few years ago he held many auto records for New York race courses.

"The Summer Girl," the latest release of the World Film corporation in which Mr. Ashley appears, is a William A. Brady production and co-starring with Mr. Ashley in the cast is dainty Mollie King. Mr. Ashley has played with various big film producing companies and some of the important photoplays in which he has appeared are "The Little Mademoiselle," "Tangled Fates," "What Happened at 22," "Miss Petticoats," "A Million Bid" and "Officer and a Gentleman." Among the scenarios he has written are "The Song of the Hearth," "His Last Call" and many of the comedies in which the late John Bunny appeared.

Mr. Ashley had a special body made for his Paige roadster. The color scheme is white and black trimmings and nickle fixtures. Wire wheels are used and the rear compartment has folding seats, leaving a deck when not in use. The car was purchased from the New York agency of the Paige.

All local merchants should advertise in the Daily Miner and keep Mohave county's money at home.

WATER BEING SERVED TO SOUTHERN SUBURBS

In about two weeks' actual time the Oatman Water & Sewer company has connected up its pipe line from the Big Jim shaft to the tanks at the Orion shaft, a distance of considerably over a mile, and is serving the residents of Mazona, "49" camp Ryan addition, Carter and Old Trails, the southern suburbs of Oatman. At Mazona it will connect a line for Oatman and this town will have the filtered water from the Big Jim.

The pressure is all gravity and in case of a cutoff at either end their would be sufficient force to deliver the water for the places now being served. But the Orion tanks would not force the water sufficiently for Oatman, though the pressure from the Big Jim will do so.

This is a temporary arrangement and is only in use until the company can place in commission its proposed larger service from wells on the banks of the Colorado river. The Orion pipe line is connected for all of the distance save a mile and a half about midway. This will be connected up quite soon. There is a well and pump at the river now and several drive-well pumps will be put in to reinforce it. Midway from the river on the line a pump will be installed for a second lift.

V. S. Rowley states that the talk being heard of other companies bringing water from the Colorado in competition with his company is absurd. He explains that they cannot get a right-of-way short of about five years. The Orion right-of-way was secured before the Indian land grants were made and is prior to them. A new company would have to get a right-of-way grant through congress, and that would be so slow as to be prohibitive.

STAR THEATER OPENS WITH IMMENSE CROWD

The opening of the Star theatre, under the management of C. A. Simons and H. King, proved to be an event in the Oatman social world. Saturday, the opening night, the house was crowded to capacity and Sunday night, with a repetition of the first night's performance, it was almost as good. Ascertaining so quickly that the people of Oatman appreciate the best there is in shows the management wired a cancellation of its two-night arrangement for films and hereafter will have a complete change of program nightly. For the time being Smithy's orchestra is furnishing the music, but in a few days the \$6000 photo-player will be here. Smithy has been retained to operate the wonderful machine.

Saturday nights when there are dances after the shows it will be left to the house to decide whether to use the photo-player music for dancing or the orchestra. Last Saturday's dance was a grand success. The management is putting in a ladies' dressing room and making all its conveniences up-to-date. The attraction tonight will be Helen Ware in "Secret Love."

ISSUE STORE PAPER

The first number of "Babbitt's Bulletin" has made its appearance and is a very creditable publication. Its contents are especially designed to meet the approval of the fair sex and glisten with timely topics dear to the mind of every housewife.

The sheet is a regulation five-column newspaper size, printed on calendered paper and is "the official organ of Babbitt's twelve stores in Northern Arizona—issued monthly at Flagstaff."

The Arizona Stores branches in Mohave County are members of the chain of stores and copies of the "Bulletin" may be had there.

FOR EFFICIENCY

Jasper Brewer, Democratic candidate for representative and one of the owners of the Mohave garage here, is in Los Angeles for the purpose of studying efficiency methods, to secure the agency for a well known tire of merit and obtain an agency for a good passenger car and truck. The methods adopted by the garage are such that their business shows a tremendous increase and daily growth.

WILL GIVE DANCE

The Indoor Chauffeurs' union, of which John Shields is president, has arranged to give a dance next Wednesday. It promises to be one of the big social affairs of the season, and as it is the initial affair of a new organization (?) the public should give the boys all the help possible.

EARL HAS BRANCH OF KOKOMO LEDGE

The Earl group, back of the Oatman Gold has come into limelight as a result of a recent strike. It belongs to the Black Brothers and was recently examined and reported upon by Francis E. Agnew. He found that it contains a branch or extension of the Kokomo ledge, the one in which the Oatman Gold struck ore, and another ledge of like importance intersecting it.

On account of the precipitous and very rugged nature of the surface Mr. Agnew recommends the use of tunnels, sites for which, he states, are numerous. An adit to tap the Kokomo vein, he says, can be put in at comparatively small cost.

All the gold of this slope, including the United Eastern and Tom Reed, he says, comes from the great rhyolite dyke traversing the country above the Earl, Argo, Oatman Gold, Oatman United, Combination and Telluride groups, and in his opinion there is no reason in the caprice of nature why one should be favored and the other not.

ALLEGED WORTHLESS CHECK MAN CAUGHT

J. F. B. Wiggertor, about 50 years old, who claims to be a newspaper man, was arrested here yesterday by Deputy Sheriff Harris upon a warrant telegraphed to Sheriff Lane by the chief of police of Needles.

It is alleged that Wiggertor passed a worthless check upon R. E. Smith, one of the proprietors of the Park Garage at Needles, upon whose complaint the warrant was issued by the authorities of that town. Mr. Smith furnished an excellent description of Wiggertor to the local authorities and he was arrested within a half hour after it was received in Kingman. When first questioned, Wiggertor denied his identity, saying that his name was "Waldro". Subsequently, however, he made statements that convinced Deputy Harris that he was the man sought and said that he would not fight return to the California town.

LEAVES FOR EAST TO CONSULT SPECIALIST

Robert Gray departed on No. 2 last evening for Boston, Massachusetts, where he will go under the care of an eye specialist in the hope of regaining the sight of an eye injured several years ago. He had long been without the use of one eye and some years ago had the misfortune to have the other injured so badly that he became totally blind. In Boston there is a specialist who is reputed to be able to perform cures that are almost miraculous and it is to this man that Mr. Gray is pinning his hope for sight. James Cowan of this place accompanied him on the trip.

ZEROLENE
the Standard Oil for Motor Cars

Sold by dealers everywhere and at all Service Stations of the Standard Oil Company (California) Kingman

Correct Lubrication Charts, Free

We have prepared charts showing the correct lubrication of the various makes of automobiles—a separate chart for each car. Ask your dealer, or write us for chart for your car.

KINGMAN COUPLE WED IN CALIFORNIA

The following appeared in the Colton, Cal., Daily Courier of August 25: The news of the marriage of Miss Marie Williams to Lenward Hart, son of Mrs. Edith Hart of this city, will be interesting to the many Colton friends of the young man. The wedding was solemnized yesterday afternoon at the summer home of the bride's parents with a very quiet service, only the immediate relatives of the bride witnessing the ceremony, directly after which Mr. and Mrs. Hart left in the new Maxwell car purchased for the occasion for a tour of the beaches. They will then drive to Francis Creek, Arizona, where a comfortable home has been prepared for the coming of the bride.

Mrs. Hart is the attractive daughter of Mr. and Mrs. E. S. Williams of Kingman, Arizona. Mr. Williams is a wealthy mine owner of that state.

Mr. Hart is well known in Colton, having been a resident of this city before going to Arizona to enter the cattle business, in which he has been very successful. He is a nephew of Mr. and Mrs. F. H. Bean of East Colton. The newly-weds are expected to stop here on their way to Francis Creek, and will reach this city tonight or tomorrow to be the guests of Mrs. Edith Hart and other relatives.

Mrs. Lucy Bulkey, Mrs. Edith Hart and Chesley Bean, who accompanied Lenward Hart to San Diego on a motor trip of a few days, have returned after a most interesting visit in and about the southern bay city. One excursion was made down into Tia Juana, Mexico, where more than 3000 soldiers were camped. Just across the border on United States territory were encamped 1600 soldiers of the United States. The party stopped on their return trip to San Diego to see the regular monthly inspection of the troops and most interesting sight.

ERROR MADE

The Miner reporter was in error in yesterday's paper in reporting M. B. Lauzon as coming from his properties. He has just returned from a visit to San Francisco and the other coast cities on mining business.

HOTEL OWNER IS WINNER IN SUIT

The suit of Henry Lovin and M. H. Force against the St. Francis hotel at Oatman was heard before Judge Ellis in the superior court yesterday. A decision was handed down granting the old owner the right to make payment of balance due on the lots, the money being tendered in open court. Under the order of the court the receiver will be discharged and an accounting of his stewardship given to the court.

Lovin and Force are willing, it is understood, to accept the tender of payment for the lots, but want the costs of court and receivership to be met by the defendant. Carl G. Krook appeared for the defendant and L. L. Wallace for Lovin and Force.

The hearing of the case of Reed against Devine and others was begun yesterday afternoon. It grew out of the sale of certain cattle on the Bill Williams fork. The tangle is one that will take considerable time of the court to unravel. E. S. Clark is counsel for Mrs. Devine and Carl G. Krook for Mr. Reed. The case will continue this morning.

FUNERAL TODAY

Undertaker Van Marter brought the remains of Mrs. J. L. Thomas from Oatman yesterday. Her funeral will be held from the Catholic church this afternoon, Father Albuoy officiating. Interment will be in the Catholic section of Mountain View cemetery. Mr. Thomas is one of the old timers of Oatman, having been in the employ of the Tom Reed company for the past five years.

If All Advertising Stopped

it would mean more than the absence of advertising in the pages of the periodicals and newspapers. It would mean that the grocer would not have his name or business over his door or on his window. The druggist would not display the globes of colored water. The minister would not announce the topic of his next sermon from the pulpit.

There would be no signboards at country crossings or on street corners in the cities. If you wanted to go to a store, particularly the best store, no one could direct you, for that is advertising by word of mouth. Frankly, you would find it practically impossible to live without advertising, although you might manage to exist after a fashion.

The great agents of civilization are those which save time and increase the comfort and convenience of the people. These are the things that make the railroads and the many applications for electricity—the telegraph, the telephone, light and power—so enormously valuable. There is no way of estimating the capacity of advertising for saving time and for increasing comfort.
